Sándor Mátyás Márton

C++ SOFTWARE DEVELOPER

Budapest, Hungary · sandormatyi@gmail.com · linkedin.com/in/sandormatyi · github.com/sandormatyi

Senior C++ engineer with twelve years across large-scale cross-platform desktop applications and performance-critical real-time systems. Comfortable owning architecture, leading small teams, and working to hard real-time constraints.

EXPERIENCE

AI-native C++ Developer, Bobcats Coding 2026

Embedded in a development team as an AI-native C++ developer, combining product work with knowledge transfer aimed at raising the team's practical AI maturity.

C++ Software Developer, self-employed 2019-present

Contracting for international clients in the professional audio industry, directly and through the Unbounded Reality collective. Consistently running multiple concurrent projects, from sole-developer ownership through to **tech lead** and **project management** roles.

> eMastered PitchPro 2025-2026
> Sole developer of a real-time pitch correction plugin, from early prototype to shipped product, including requirements gathering and stakeholder alignment.
>
> VCV Rack 2025
> Integrated the AAX SDK to bring a virtual modular synthesizer platform to Pro Tools, and replaced the low-level audio driver libraries to add ASIO support. Contributed to and reviewed the designs for the new API architecture, and prepared the Rack SDK for its version 3 release.
>
> Akai Professional Studio Instrument Collection 2022-2025
> **Tech lead** of a three-developer team on a cloud-based sampler plugin: multisample synth engine, proprietary effects, and a separate admin application managing the cloud sample database.
>
> Infinite Album 2021-2023
> Made the audio engine of an AI-driven interactive music system real-time safe, and worked on features across several layers in Python, C++, C# and JS. Streamlined build and deployment, and set up the basic CI pipelines.
>
> WalkMix Creator Suite 2020-2026
> Spatial audio authoring suite supporting Sony 360 Reality Audio, now bundled natively in Pro Tools for higher-tier subscribers. Owned localisation, crash monitoring, speaker layout and audio output mapping, and the standalone Player app.

Also contributed to **Wide Blue Sound Silencer**, **StudioLinked Studio** and **BPB Saturator**.

Mentor and C++ Lead, Green Fox Academy 2018-2020

Taught roughly 200 students across C++, embedded programming, machine learning and computer vision, and web development in Java and React. Owned and developed the C++ teaching materials and course syllabus. Tech lead and mentor to several project teams of five.

C++ Software Developer, GRAPHISOFT SE 2014-2018

ARCHICAD, a cross-platform architectural BIM CAD application written in C and C++. Worked across 3D geometry, user interface and data management. The hardest parts were working in a codebase that had been under continuous development for over thirty years, and keeping data consistent across distributed systems.

EDUCATION

BSc Software Engineering, Budapest University of Technology and Economics 2012-2017
